Current Projects

Blazor Portfolio Website (In Progress)

Developed a custom portfolio web application using Blazor to showcase personal projects, development techniques, and code snippets. Currently looking for good hosting options. Key features include:

- ❖ MVC architecture with dynamic data retrieved from a MSSQL database
- ❖ RegEx-based code formatting for clean code display
- ❖ Real-time project rendering and categorization

3D Graphics Engine & Ray Tracer (Java & C#) — [On Hold]

- ❖ Designed and implemented a custom 3D graphics renderer in Java without external libraries, focusing on core rendering principles.
- ❖ Developed a basic ray tracer as a proof of concept in c# to demonstrate lighting, shading, and camera perspective calculations from scratch.

Project details available on request.

About Me

Ambitious Junior Software Engineer with 1 year of industrial experience in Full Stack Development and workplace automation, gained during employment at SDS Group.

Skilled in collaborative development, problem-solving, and adapting quickly to new challenges. At SDS, I worked with a diverse tech stack including C# and .NET, developing and maintaining custom websites tailored to client requirements within Agile development cycles.

A key achievement was independently delivering a web-based tool, assigned outside my core responsibilities, to interface with legacy systems, significantly improving internal workflows and demonstrating initiative and ownership.

Technical Skills

- ❖ Languages: C#, Java, GML2 , Python, SQL
- ❖ Frameworks & Libraries: .NET, Blazor, ASP.NET, Entity Framework
- ❖ Web Technologies: HTML, CSS, Razor, REST APIs
- ❖ Tools & Platforms: Visual Studio, Git, Azure, MSSQL
- ❖ Database: SQL Server
- ❖ Other: Agile, Regex, Debugging, Automation

Relevant Work Experience

09/2024-Present

SDS Group, New Milton - Junior Software Developer

- Responsible for Full stack development, specialising in C#, [ASP.Net](#) and SQL
- Experience with .Net Web development Frameworks and practices
- UI and UX disciplines explored
- Working with a team of 8 other software engineer professionals

01/2022-09/2024

Sorica LTD, Stoke-On-Trent - Manager (Remote)

- Generated Invoices for clients
- Handled B2B Relations
- Managed Daily operations for a team of 5
- Ensured Timely Deliveries
- Use of Office 365 Technology for workplace automation to improve team efficiency

05/2021-Duration 1 Week

JP Morgan, Bournemouth – Computers in Business week:

- Designing a system based on a scenario and present it at an exhibition
- Working as a team using SCRUM methodology
- Producing interview questions to enable the team to gather system requirements
- Using the MoSCoW methodology to prioritise system requirements

Education

09/2022 - Present

Bournemouth University, Bournemouth - Bsc. (Hons.) Software Engineering

Modules: Machine Learning, Databases, Applications of programming, Business in IT , Project Management and Teamwork.

09/2019 - 06/2021

Stoke-On-Trent SFC, Stoke-On-Trent - (Btec) Digital Game Design and Development

Modules: 3D modeling, 2D and 3D Game Development, Computer security, Programming Principles, Concept Art, Game Testing.

Awards

CIW Advanced HTML5 and CSS3 Specialist v2.0(1Do720)-UCertify
Python Fundamentals-UCertify
